Re: Mobile Literacy Center Initiative in Crisp County

Mr. Buckley,

I write on behalf of Family Connection's Early Child Development and Health Education Cohort, as well as Crisp County Pre-K. We would like to propose a partnership with Cordele Rotary, and thank you for your consideration. The purpose of the Mobile Literacy Center is to bridge gaps in parental knowledge and experiences by bringing literacy and social emotional development training to families via a Mobile Family Literacy Center, which will be created in a retrofitted bus. Through our collaboration with local partners we can visit neighborhoods and community sites to deliver interactive early literacy workshops and home-based resources. Because transportation and scheduling create barriers, the Mobile Center will increase community access to training opportunities and literacy resources for parents.

If awarded your financial support, we would utilize the funds to purchase books and materials to be used by families. If funds have specific parameters for expenditure, we are flexible to ensure the process is simple.

Thanks again for your consideration. I ensure you; your effort will strongly impact our children, and our overall focus on improving 3rd grade level reading.

With Respect,

A handwritten signature in black ink that reads "Monica Warren".
